Miroslav Kučera what is the purpose of all this? In Slovakia, it's not possible to get something for free without any purpose. For sure you are not a charity, there is something else in it. I don't trust your website

Turbado.sk I might explain it this way. Turbado is not a Slovakian company, we are an international company. This event is to welcome Turbado in Slovakian market and tap into customer's subconscious mind..

August 5 at 12:36pm

Miroslav Kučera for sure you are not Apple premium reseller and when I see your logo at the connector, I can be sure it's not an original one. Original charger has a chip so your fake charger will not charge my iPhone. August 5 at 12:41pm

Miroslav Kučera and you said you tested it in China, so I believe you are offering fake Chinese Iphone with an android.

August 5 at 12:43pm

Turbado.sk I understand your outrage but all Apple chargers are manufactured in China. Many bad products and well as very high quality products are coming from China. All depends on the manufacturer, order and price. You can try our complimentary Turbado chargers with 2 years warranty. It had been produced according to A1400 standards. August 5 at 1:23pm

Miroslav Kučera a1400 in an adapter, it has nothing to do with the connector... in lightning connector there is original chip from Apple...you would have to have the original lightning, but Apple will never allow you to get your logo on it. So you didn't convince me as I know am right & it's useless for me to get your charger that will damage my Iphone.

August 5 at 1:26pm

Turbado.sk You are right, we are not an Apple Premium Reseller. This way we would not be able to get a low price for our Iphones. We would be bound with their standard prices. And we don't want that.

August 5 at 1:26pm

Miroslav Kučera It's highly possible that many people will grab it but those who know everything about Apple world will never go for it. Also, I had studied your business conditions That says it all.

1 · August 5 at 1:28pm

Turbado.sk You have the right for your own opinion. We gave out more than 1000 connectors and all works perfectly. What exactly you don't like about our business conditions? Maybe I could clarify some inconsistencies.

August 5 at 1:51pm

Turbado.sk I would like to also add that our goal is to stay on the market for a long time and convince Iphone owners, when they will be considering new Iphone purchase, to have a look on our website and on our offer. Officially, the price of an Iphone from Apple is around 700 Euro. In Orange you get it for 680 euro, T-mobile and O2 has it a bit cheaper, premium resellers in shopping centres have it for over

600 euro and for example Datart has in for 599 euro. Datart is not a premium reseller but sells it for the official Apple price. There is only one Iphone but the prices are different it its for Czech-slovakian-german or spanis market. Only the brochure is different but everything else stays the same.

Turbado.sk <http://turbado.info/.../turbado-iphone-5s-user-manuals.../>

August 5 at 10:39pm

Turbado.sk regarding the adapter, every single piece had been tested in 3000V and the chip is set up that if it gets overheated over 60C, it switches off. We didn't test the lighting cable. Maybe we should as there is 3% of them which doesn't work. But the rest of them (97%) works perfectly, the same as the original from Apple. We will be happy if someone of our customers test the transmission speeds and various scenarios of cable used by us and the original from Apple.

August 5 at 10:43pm

Turbado.sk regarding the business conditions. We came to the market with completely new business model which is reflected in the business conditions. Business conditions are to protect our company against speculators, but also meet all legal requirements. In addition we offer the possibility to return the goods within 30 days instead of 14 days without any reason, we guarantee to solve your repair immediately, and not in 30 days, you can return the goods to us anytime and you always know in advance how much you get for it. Or you can get every year a new model and pay just the difference between your old Iphone and the new one.

August 5 at 10:47pm

Turbado.sk We are very shortly on the market that's why we chose to firstly find out what our customers want, what are they afraid of, what are they expect and what are they willing to pay for our services. We are listening to you in order to improve. That's why your critics is important for us because it helps us to move forward more than customer that doesn't say anything and is satisfied with everything, no matter what he has.

1 · August 5 at 10:50pm

Miroslav Kučeraj just for your info, the chip is not in the adapter but in the lighting connecter and apple manufactured said that the non-original chargers will never work properly. Think about that I and other people writing to you. That its not charging nor working, its not because its bad piece but not the original piece. After seeing your unprofessionalism regarding apple product is clear that I would never buy your apple products.

1 · 15 hrs

Martin DjMates Pristach when is the chip overheated (60'C) it switches of. Its not the chip but thermal protection pulsed source. Sure they're fake ...

Matúš Bakala I have an iPhone 5s and have the charger and don't need other one. I am afraid you will misuse my IMEI...I won't risk it with my 900 Euro Iphone.

3 · August 5 at 3:20am

Turbado.sk Hello, through IMEI you can find out the type, country and until when the warranty is due. Other information has an Apple and your seller. You don't have to be afraid

August 5 at 3:23am

Mardtyni Beerhouse If you could easily misuse the IMEI, they would never place it at the pack of the cover. The company is honest...

2 · August 5 at 4:29am

Turbado.sk mr **Matúš Bakala**, send us by email (ahoj@turbado.sk) photo of your phone (in the mirror?)and your postal address and we will send you your charger if you are interested. 1 · August 5 at 7:06am

August 5 at 10:09pm

Čaník František What's the logic to pay 0,02Euro for indefinite period as your contract says? I am really interested about your business model as it smell badly ala register and pay registration fee. A) I paid the whole amount for the goods and then I have to pay yearly rent? WTF? B) what kind of sell it is when it's not a sell? I see it as not legal activity here is SK.

August 5 at 1:13pm

Turbado.sk Yes this is our new model and its legal all over EU. Our profit is not just the amount paid for the goods, but buying in bulk, custom logistics, own warehouses, etc..

August 5 at 1:45pm

Čaník František Logically, who "buys" something that he has to pay 0.02 Euro for the rest of his life? Where is the guarantee that this sum is final (not to mention, that all is a crap)? At the same time, why would I be interested in logistics, warehouses and so on. When I can pay for the whole product and also the postage? Why should I pay "rent" on something I paid for already?

August 5 at 1:51pm

Čaník František + A few observations, why do I feel this your system as a full scam: 1) photo of the shop "location" is from osakapower.com which is in Austin, California ... (<http://www.osakapower.com/images/footer-corporate.jpg>) 2) a photograph of the car is just a mock-up of the new Octavia (<http://www.vwvortex.com/.../2013-skoda-octavia-2-...>), 3) hosting directly through the cloud ... 4) previous company Purnise SE was renamed at the end of the year ... headquarters in Bratislava, on the Turbado web Piestany? 5) It smells as if something like that could somehow be believed

August 5 at 2:18pm

Turbado.sk . Well there's photos kept by designers when they made the proposal. You're right, it would be time to change it and update it

August 5 at 3:10pm

Turbado.sk Our business model is as follows: the amount paid at the beginning is the deposit for the goods you receive from us. Law states that we must annually invoice it, so there is the annual amount 0.02eur that we comply with the law. If this amount is not paid by you, we will pay it from the deposit you paid at the beginning. And then when the goods will be returned, whether it be in a week, a year or in one hundred years, you will always receive an aliquot portion, according to the time you had use it and phone condition. The sooner you return it in the best possible condition, the higher the amount you get for your phone will be. Conversely, the later or drowned in sea phone you return, the amount is smaller. Or you can exchange yours for a new model and just pay the price difference and every year you keep the latest model. But especially when your phone goes wrong, you will not be without a phone for 30 days while it will be repaired, but we will give you complete new.

August 5 at 10:14pm

Turbado.sk An updated picture of our office in Presov

1 · August 5 at 10:16pm

Turbado.sk We didn't get any car yet, but when you and other customers will be satisfied with us, we will get a Turbado car in SK also. And the purpose is to offer co-sharing, so people can rent it for a few hours or a day through <http://www.zipcar.com/> or other systems. We will see.

August 5 at 10:20pm

Turbado.sk regarding the servers, we are using one of the most secure servers in EU, from Lausanne in Switzerland from the firm <https://www.exoscale.ch/>. Those servers are very flexible, they have great connectivity to the whole Europe. We are very satisfied with them so far.

August 5 at 10:25pm

 **Turbado.sk** Hi, we ask for IMEI only to check if you are an Iphone owner. We can check it differently as well. For example if you send us iMessage (blue MSG) or you make pictures of your phone (in the mirror?). 20 hrs

Adam Granko Gešo I really want to get a reasonable answer to the question why do you need IMEI.

August 8 at 10:40am

Mirka Karafová In order for them to know if you have an iPhone. Because everyone could say that have one and get free charger and then sell it for profit.

2 · August 8 at 12:52pm

Turbado.sk exactly. We want to make sure, you are an iPhone owner. You don't have to give us IMEI, we ask it when you order it online as we check it in Apple database. It's also enough if you send us iMessage (blue MSG) to +421 948 007 920, or a photo of your iPhone (mirror?) and of course your postal address and we will send you free charger.
